Forward-Looking Statements

Certain statements contained in this presentation constitute forward-looking statements within the meaning of applicable securities laws, including, among others, statements made or implied relating to RTG's objectives, strategies to achieve those objectives, beliefs, plans, estimates and intentions, and similar statements concerning anticipated future events, results, circumstances, performance or expectations that are not historical facts.

Forward-looking statements generally can be identified by words such as "objective", "may", "will", "expect", "likely", "intend", "estimate", "anticipate", "believe", "should", "plans" or similar expressions suggesting future outcomes or events. All statements, other than statements of historical fact, included herein, including, without limitation, statements about the development and exploration potential of the properties, use of proceeds and the business objectives of RTG are forward-looking statements. By their nature, such forward-looking statements are not guarantees of future performance and reflect RTG's current beliefs based on information currently available to them. Such statements involve estimates and assumptions that are subject to a number of known and unknown risks, uncertainties and other factors inherent in the businesses of RTG and the risk factors discussed in materials filed with the relevant securities regulatory authorities from time to time which may cause the actual results, performance or achievements of the companies to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Those risks and uncertainties include, but are not limited to: the mining industry (including operational risks; risks in exploration, and development; the uncertainties involved in the discovery and delineation of mineral deposits, resources or reserves; and the uncertainty of mineral resource and mineral reserve estimates); the risk of gold, copper and other commodity price and foreign exchange rate fluctuations; the ability to fund the capital and operating expenses necessary to achieve stated business objectives; the uncertainty associated with commercial negotiations and negotiating with foreign governments; the risks associated with international business activities including disputes with joint venture partners; risks related to operating in the countries in which the respective companies operate; environmental risk; the dependence on key personnel; and the ability to access capital markets.

Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date the statements were made. Readers are advised to consider such forward-looking statements in light of the risks set forth above. Except as required by applicable securities laws, RTG assumes no obligation to update or revise any forward-looking statements to reflect new information or the occurrence of future events or circumstances.

Cautionary Note

The information contained in this document has not been independently verified. No representation or warranty, express or implied, is made as to, and no reliance should be placed on, the fairness, accuracy, completeness or correctness of the information or opinions contained herein. None of RTG, or its respective advisors or representatives shall have any responsibility or liability whatsoever (for negligence or otherwise) for any loss arising from any use of this document or its contents or otherwise arising in connection with this document.

This document does not constitute or form part of, and should not be construed as, an offer, invitation or inducement to purchase or subscribe for any securities nor shall it or any part of it form the basis of, or be relied upon in connection with, any contract or commitment whatsoever.

Strong Board and Management

The right team to deliver value and success

- Developed **7 mines in 5 different countries** around the world specialising in emerging markets
- **Well-established relationships** in the Philippines, with Landowners at Panguna and Kyrgyzstan
- **>15 years experience** in-country in Philippines
- Most recent mine acquired by B2Gold for **US\$1.1 billion** in 2013, with an original shell of \$2.5M (Philippine asset – Masbate Mine)
- Proven ability to create **significant value** through fast-tracked and successful new developments
- New Cu/Au development opportunity with exciting exploration potential and new exploration play with significant scale and grade potential in Kyrgyzstan

MICHAEL CARRICK

Chartered Accountant with over 30 years in the resources sector. Michael was previously Chair & CEO of CGA Mining, Chair of AGR & CEO of Resolute. Prior to Resolute, he was a senior international partner of Arthur Andersen.

CHAIR

JUSTINE MAGEE

Chartered Accountant with extensive experience in the resource sector having headed the corporate & finance areas for Resolute Limited for 6 years. She was formerly a director of AGR Limited, director and CFO of CGA Mining Limited, and is also a director and CEO of RTG.

CEO

MARK TURNER

Mining Engineer with over 30 years' experience in the resources sector. Mark has been responsible for the start-up and operation of mines in Australia, East and West Africa and Asia. He was previously General Manager of Operations of Resolute Mining Ltd.

COO

RTG Management's Competitive Advantage

Relationships with Host Countries and Communities

Proven track record managing political risk and succeeding in countries around the world

Guiding Business Principles

- Win & maintain social licence with landowners & Host Governments
- Always do everything to deliver on our promises
- Deliver respect & sensitivity
- Develop and maintain dedicated senior executive relationships with Government officials and strong in-country managers
- Adopt a win-win approach
- Maintain ongoing commitment to local employment at all levels

RTG Investment Proposition

Why invest in RTG Mining?

- Flagship Mabilo Project is **listed as one of the priority projects for the Philippines** – the MGB has been very supportive of Mt. Labo's efforts and the Project
- Mabilo is a world-class high-grade copper/gold project (**CuEq 4.61% Reserve**), fully permitted MPSA (mining permit) and ECC
- Mabilo Project nearing a commitment to development
- **Finance for 100% of Capex** of Stage 1 agreed on competitive terms and offtake for 100% of products – Glencore International AG
- Strong Philippine partner, **the Villar Family**, one of the most prominent families in the Philippines
- **DSO start-up operation at Mabilo has strong near-term cashflow** (US\$145M net cashflow) with nominal capital, with 81% of net cashflow from **21% supergene chalcocite**
- **Early Repayment of US\$27m of debt to RTG from DSO proceeds**
- Strong exploration potential to significantly grow the existing resource base at Mabilo as drilling was suspended prematurely in 2015
- **Multiple growth asset opportunities** within the RTG portfolio include a possible role in the redevelopment of Panguna and the exciting Chanach Project with significant exploration potential

Mabilo Project

HIGH GRADE COPPER-GOLD

Mabilo Project Summary: High-Grade Copper Gold

High-grade development-ready project with a strong pipeline of exploration prospects to grow existing resource base

CuEq Resource: 532kt (1,173M lb) @ 4.19%* CuEq Reserve: 359kt (792M lb) @ 4.61%*

- Mining Permit and Environmental Clearance Certificate
- Financing & Offtake for 100% of Stage 1 Capex and products
- **US\$574 Million** NPV5 at current commodity prices*
- Highly sensitive to uplift in commodity prices given high-grade profile
- Groundbreaking ceremony completed
- Final operating permitting and surface rights to be finalised
- Extensions & Porphyry Source Potential
- Porphyry Targets Identified & New Drilling Targets

* Eq calculations at US\$4.21/lb Cu, US\$2,900/oz Au, US\$104/t Fe (before recoveries) with NPV calculations using the same commodity prices.

RTG Portfolio Philippines

High-value assets from exploration through to development stage

Mabilo

Development: Near-Term Potential

- Bankable Feasibility March 2016
- Fully Financed Stage 1 , financing and offtake with Glencore
- EPEP and FMR/DP approved March 2019
- Mining Permit granted May 2020
- Won Final Award in Arbitration late 2020 and Setting Aside Action in late 2021*
- Deal with new partner, TVIRD agreed May 2023
- Excellent exploration upside from both extensions and strong confidence in location of porphyry source
- Flat topography, no artisanal miners, roads to project, good infrastructure with power, water and a port 40km by road
- Extensions along strike and at depth
- Porphyry targets identified

Bunawan

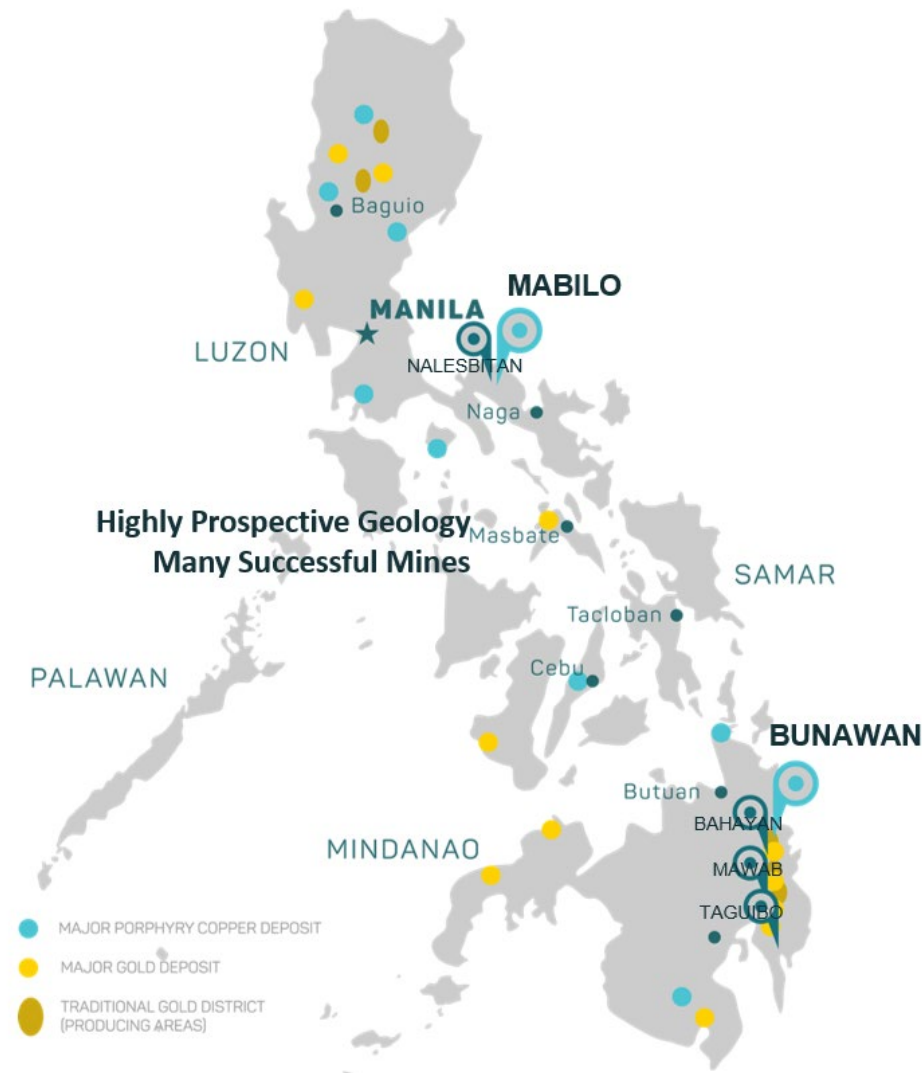

Exploration: Excellent Potential

- 4 projects in prolific mining region (surrounding X64 previously Medusa Mining)
- High-grade Au targets on all

Nalesbitan

Exploration: Copper-Gold Porphyry Potential

- High sulphidation epithermal gold and associated copper outcrops
- Multiple porphyry targets identified

* Enforcement in the Philippines in progress

Mabilo Project: 2015 Resource & Reserve Estimate

Major upside potential at Mabilo: Only 18,000m drilled to date

Mabilo Resource Indicated and Inferred	Million Tonnes	Au g/t	Cu %	Fe %	Contained Au (‘000s oz)	Contained Cu (‘000s t)
<i>Total Resource</i>	12.76Mt	1.9g/t	1.80%	40.5%	762.5oz	226.8t (499M lb)
Supergene Chalcocite	0.10Mt	2.30g/t	23.2%	-	7.6oz	23.7t (52.1M lb)
Primary Skarn	11.94Mt	1.8g/t	1.6%	40.5	692oz	190.9t (420M lb)
<i>Reserves</i>						
Probable	7.792Mt	2.04g/t	1.95%	45.5%	511.1oz	151.9t (335M lb)
Supergene Chalcocite	0.104Mt	2.20g/t	20.7%	-	7.4oz	21.5t (47.5M lb)
Primary Skarn	7.025Mt	1.99g/t	1.73%	46.1%	450.2oz	121.5t (267M lb)

Mabilo Project: New Mineralised Zones

Open along strike, down plunge, regionally

Plan View

OXIDE RESOURCE

Oblique 3D

Mabilo Project: Stage 1 US\$30M Binding Finance Terms Agreed

Debt financing for 100% of DSO CAPEX Plus working capital/overrun Facility

- Estimated capex of under US\$25M (with allowance for capitalised interest) and working capital of up to US\$7.5m
- Debt facility agreed with Glencore, a highly respected international global leader for **US\$25m and US\$5m working capital/cost overrun** at lender's election
 - Coupon of 5% to SOFR
 - No Arrangement Fee
 - Repayable on or before 26 months following Borrower Commitment Date
 - Typical security terms and conditions
 - Legal due diligence nearing completion
 - Long form documentation currently being prepared
- Early access to first US\$3.5m for completion of land acquisition
- Offtake terms agreed for all products on market terms
- Glencore has the PASAR smelter and refinery in the Philippines where all products will be shipped which provides further benefits for the Philippines as a whole and reduced shipping costs

Mabilo Project: Strong Cashflow to RTG

Share of Economics Approx. **US\$339M*** (After Tax Cashflow and Debt before any Exploration Success) with an NPV5 of **US\$285M***

Key Deal Terms:

- One company structure - 60% held by TVIRD and 40% by SRM Gold/RTG
- Typical minority protection clauses in shareholder agreement
- **Additional 2% NSR for SRM Gold/RTG**
- Debt of approx. **US\$27M to be repaid to RTG early from proceeds of Stage 1 DSO**
- **RTG share of Stage 1** proceeds of approximately **50% (US\$72M*)**
- Funding – only 40% for RTG

**US\$4.21/lb Cu, US\$2,900/oz Au and US\$104/t Fe, before any exploration upside and after tax*

Mabilo Project: Stage 1 DSO Start-up

Net cash flow after tax from DSO forecast at US\$145M*

- Strong collaboration between the teams as the focus continues towards commitment to start-up of high-grade DSO operation planned first half 2025
- Updated review of the DSO CAPEX costs in the Feasibility Study, confirmed the capex budget remains at less than US\$25 million and has actually reduced
- Primary source of ore being the 0.104Mt of supergene chalcocite material at an average reserve grade of 20.7% Cu
- Payabilities now reflect agreed term sheet with Glencore

Products by Month

1-5	Gold Cap	~300,000 t @ avg 3.08 g/t Au
	Offtake Terms Agreed	50.12% Au Payability
3-7	Cu / Au Skarn	~150,000 t @ avg 2.7% Cu & 2.7g/t Au
	Offtake Terms Agreed	18.71% Cu & 49.15% Au Payability
	Supergene Chalcocite	
7-12	Delivers 81% of net cashflow after tax	~100,000 t @ avg 21% Cu & 2.3g/t Au
	Offtake Terms Agreed	86.74% Cu and 89.84% Au Payability

* Assumes US\$4.21/lb Cu, US\$2,900/oz Au, US\$104/t Fe

Mabilo Project: Economic Highlights

\$574M* NPV5 After - Tax

Stage 1 – Direct Shipping 18 Months (Updated 2024)		Stage 2 – Primary Concentrate Production (2016 Feasibility Study)	
Capex	<\$25M	Capex	\$164M
		Pre-strip	\$31.1M
Net Operating Cashflow (after tax)	\$145M*	Net Annual Operating Cashflow (after tax)	\$140M*
Production	25,200t Cu 53,000oz Au 133,500oz AuEq**	Annual Production	17,700t Cu 66,800oz Au 43,200t CuEq** 138,400oz AuEq**
Average Cash cost	\$72/t \$0.45/lb CuEq \$311/oz AuEq	Cash cost	\$91/t \$1.21/lb CuEq** \$833/oz AuEq**
		Current Mine Life	7 years

*Commodity Prices used US\$4.21/lb Cu, US\$2,900/oz Au and US\$104/t Fe

**Equivalents after recoveries

Before exploration upside, based on the 2016 Feasibility Study as announced with Stage 1 updated numbers 2024

Mabilo Project Summary: Strong Leverage to Copper Price

Approx. 50% of the project contribution comes from copper, with expectations of improved copper prices

	Current Commodity Prices* US\$M	10% Increase in Cu US\$M**	20% Increase in Cu US\$M***
NPV5	\$574M	\$637M 11% increase	\$700M 22% increase
Net Cashflow from DSO (after tax)	\$145M	\$158M 9% increase	\$171M 18% increase
Ave Ann Net Cashflow Stage 2 (after tax)	\$140M	\$150M 7% increase	\$161M 15% increase
RTG Share of Cashflow/Share****	\$339M A\$0.469	\$372M A\$0.514	\$405M A\$0.559
RTG Share of NPV5/Share****	\$285M A\$0.394	\$312M A\$0.431	\$339M A\$0.468

*US\$4.21/lb Cu, US\$2,900/oz Au and US\$104/t Fe, 100% of Mabilo Project

**US\$4.64/lb Cu

***US\$5.06/lb Cu

**** Current issued capital and A\$/US\$ of 0.62

Mabilo Project: Targeted Timeframes

Development commitment and exploration to grow resources and reserves

Current focus will be acquisition of remaining surface rights with Glencore financing, then final permitting for clearing land

Approx. 9-month development timeline

Following 4 – 5 months mining the high-grade supergene chalcocite copper material (reserve grade 20.7% representing approx. 83% of DSO net cashflow)

Target to commit to development and DSO start-up in second half 2025

First 6 months of operations producing Oxide Gold Cap and Cu/Au skarn material

Commence detailed engineering and commitment to long lead items for Stage 2 following commencement of DSO

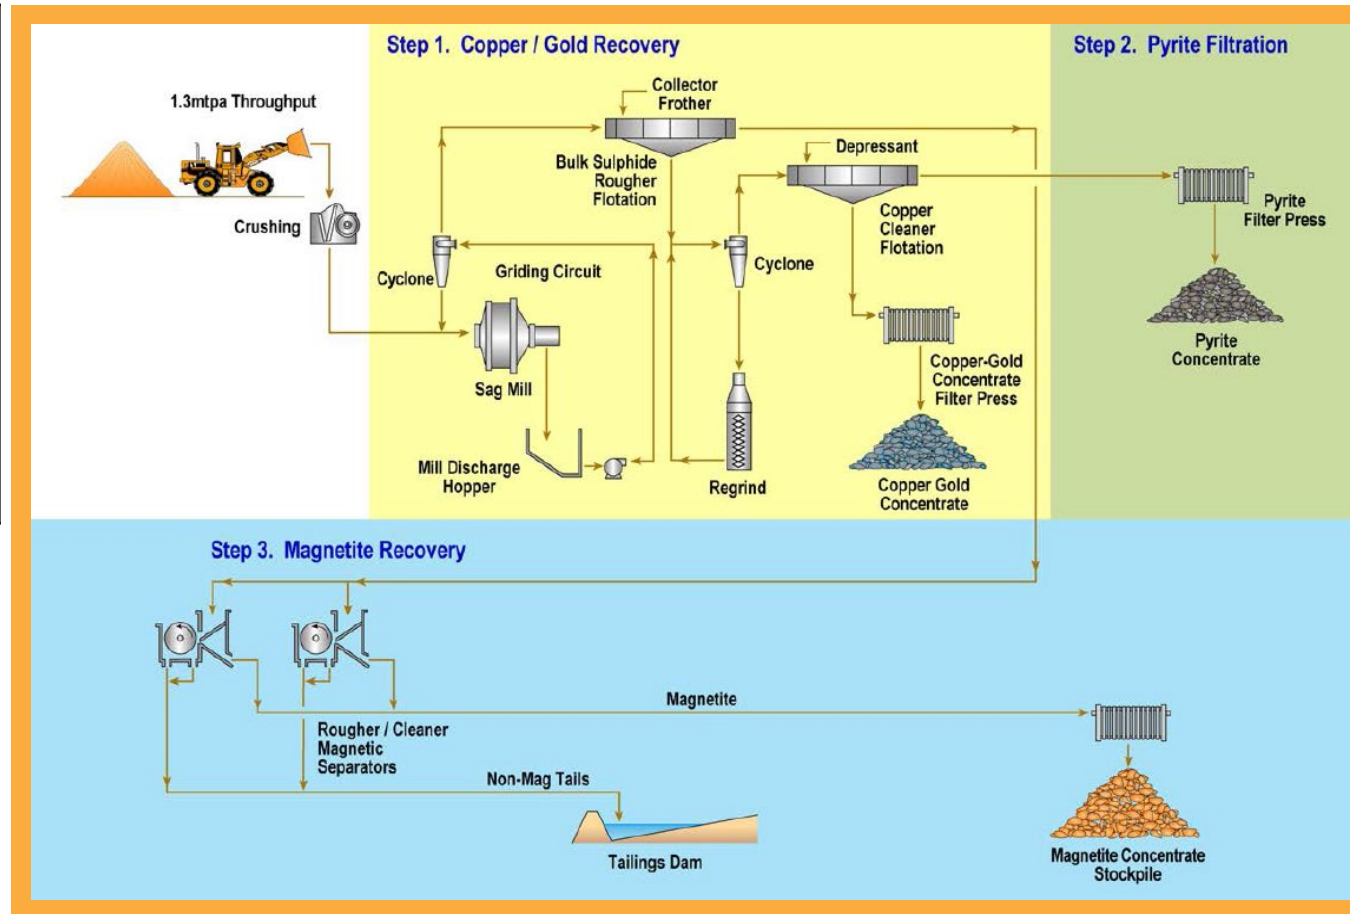

Mabilo Project: Stage 2 Primary Concentrate Production

Three high-quality & clean concentrate products

Concentrates	Average Produced/Year	Average % of Net Cashflow*
Copper-Gold 27% Cu & 21 g/t Au	65,000t	84.6%
Pyrite 3 g/t Au (46% Sulphur)	220,000t	4.9%
Magnetite 65% Fe	535,000t	10.5%

- 1.35 Million Tonne per Year Flowsheet
- Low-Risk Plant
- Limited deleterious elements, potential for small mercury & arsenic penalty
- Recoveries

Cu 83.7%
Au 84.9%
Fe 60.7%

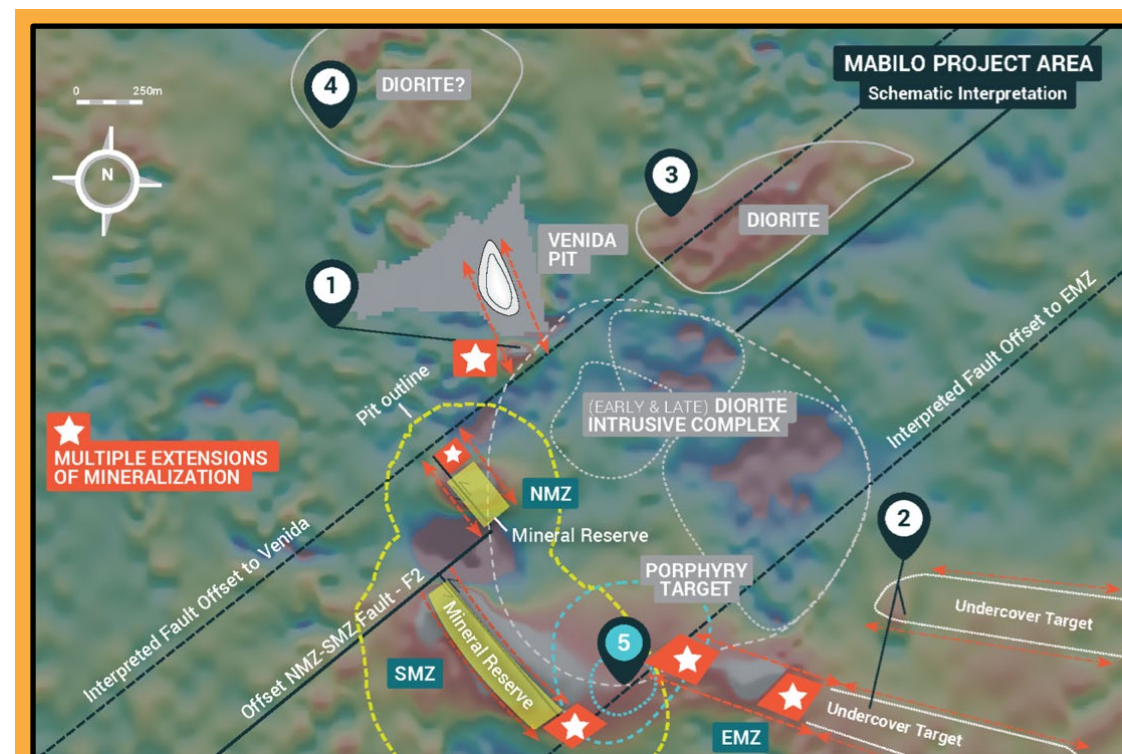

*Based on US\$4.21/lb Cu, US\$2,900/oz Au and US\$104/t Fe

Mabilo Project: Exciting Exploration Potential – 3 New Sources

Potential for high-grade copper/gold corridor & porphyry target at depth

- Only 18,000M of drilling to date, drilling truncated early by ex partner Galeo
- Strong growth potential in current reserve and resource with infill and step out drilling, along strike and at depth
- Strong regional targets
- Further testing of extension and porphyry source targets planned

Magnetic Anomalies

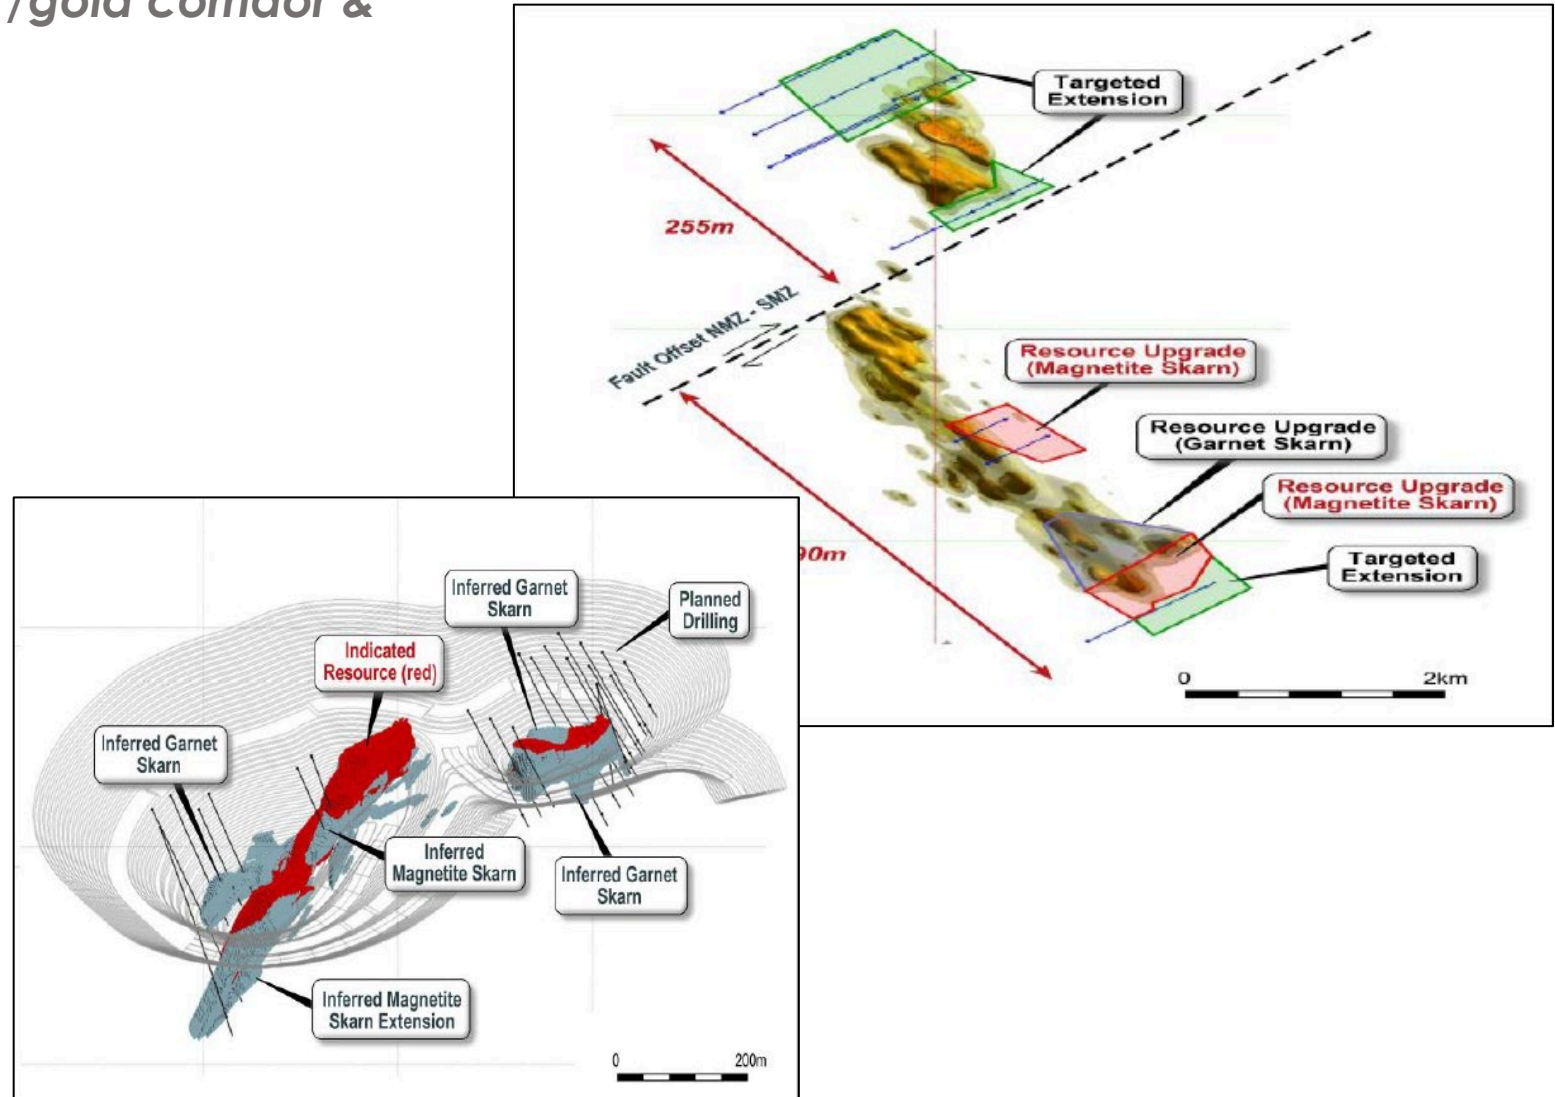

- 1 – Venida Pit mag high anomaly
- 2 – Open to the East along strike, continued under thick cover

- 3 – Diorite (early & fertile source) chalcopryrite in veinlets & fractures
- 4 – Untested circulated magnetic feature
- 5 – Porphyry Target

Mabilo Project: Growth Along Strike and at Depth

Potential for high-grade copper/gold corridor & porphyry target at depth

- **Drilling priority:** Targeting resources within the current pit design at relatively shallow levels to come into the mining phase early
- 1.6 Mt inferred resource inside the pit, including garnet skarn zones high in the pit, some containing significant grade (MDH95 25.8m @ 2.32% Cu & 1.63 g/t Au)
- 3,000m of planned drilling designed to upgrade resource classification and extend the strike length of resource
- Planned drilling targeting strike extension on the North and South by a further 120m

Mabilo Project: Exploration Game Changer

High-quality porphyry drill targets

- Magnetic feature correlated with Chargeable body directly adjacent to magnetite skarn resources
- Strong magnetic body South of Venida pit correlated with strong Chargeable body
- The NE dipping orientation of the buried Chargeable body is consistent with a porphyry that intruded the sediment sequence hosting carbonates that interacted with the porphyry intrusive from extensive magnetite skarns
- Subsequent tectonics rotated with the package and deep erosion has occurred such that magnetite skarn bodies no longer contact the Porphyry intrusive
- **Possible plan - 3 holes of 600m – 800m in depth drilled to test the geophysical anomaly between the South and East Skarn Orebodies**

Mabilo Project: Exploration Game Changer

Porphyry signature: strong evidence of porphyry located close to identified orebodies

- MDH-94 bornite-molybdenite chalcopyrite with rare visible gold around 150m
- Re-log of MDH-03 at 120m showed porphyry-style veining bornite-chalcopyrite with elevated copper and bismuth
- Spatial distribution of porphyry-style veins
- Metallogenic vectors, pyrite overprinting, molybdenite and bismuth increasing towards the porphyry target
- Chlorite alteration intensity increasing in proximity to the porphyry target
- Fluid inclusion studies indicate temperature increased towards the porphyry target
- Skarns with trace copper and gold on the EMZ and SMZ are in close proximity to the target
- Calc-silicate alteration trends are dominated by pyroxene with garnet skarn prevailing in proximity to the porphyry target

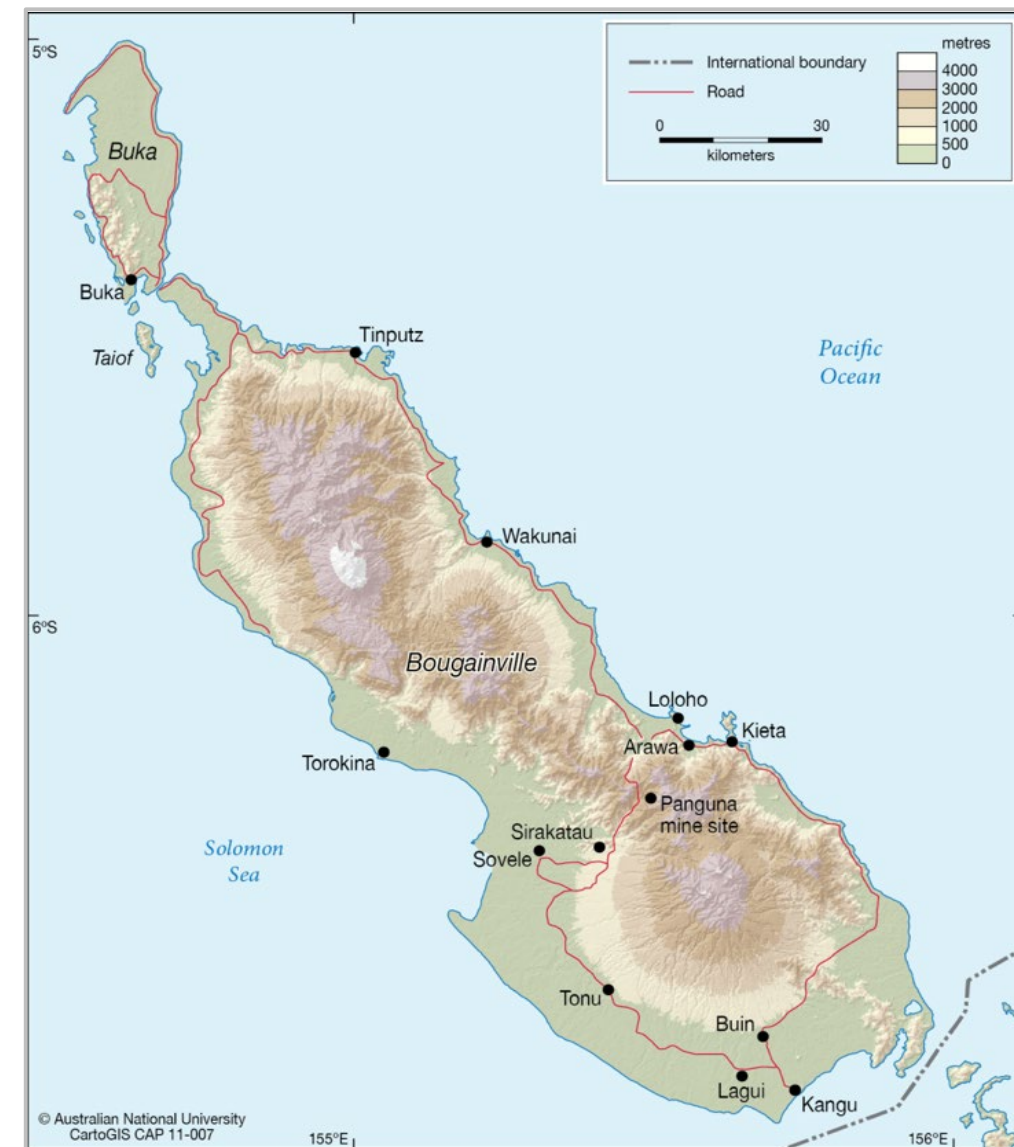

Panguna Project

OPPORTUNITY FOR REDEVELOPMENT

The Bougainville Opportunity

*RTG nominated as the Landowner's developer of choice
only developer to have secured critical Landowner support*

- Panguna Mine was the largest operating copper & gold mine in the world, operated for 17 years and produced 3Mt or 6.6B lb of Cu & 9.3M oz of Au
- Landowners own the **US\$105 billion*** of minerals sitting at the base of the old Panguna Mine pit due to the change in the Mining Act
- Joint Venture Agreement signed between the Special Mining Lease Osikaiyang Landowners Association ("SMLOLA") and Central (70% owned by RTG)
- Successful Referendum on Independence in December 2019 with 98% of the vote in favour
- President Toroama was successfully elected in September 2020 with an initial focus on domestic issues and progressing Independence
- **The President and Vice-President have announced that Bougainville is open for business** and are encouraging the international business community to consider investments
- The ABG has now issued the EL to BCL (as it is controlled by the ABG) in an effort to fast-track the redevelopment plans and is considering joint venture partners for the project

Bougainville Opportunity: BCL Mineral Resource

US\$105 Billion in minerals in the old mine*

**Resource Statement based on announcement of Bougainville Copper Limited on the Australian Stock Exchange dated February 2016

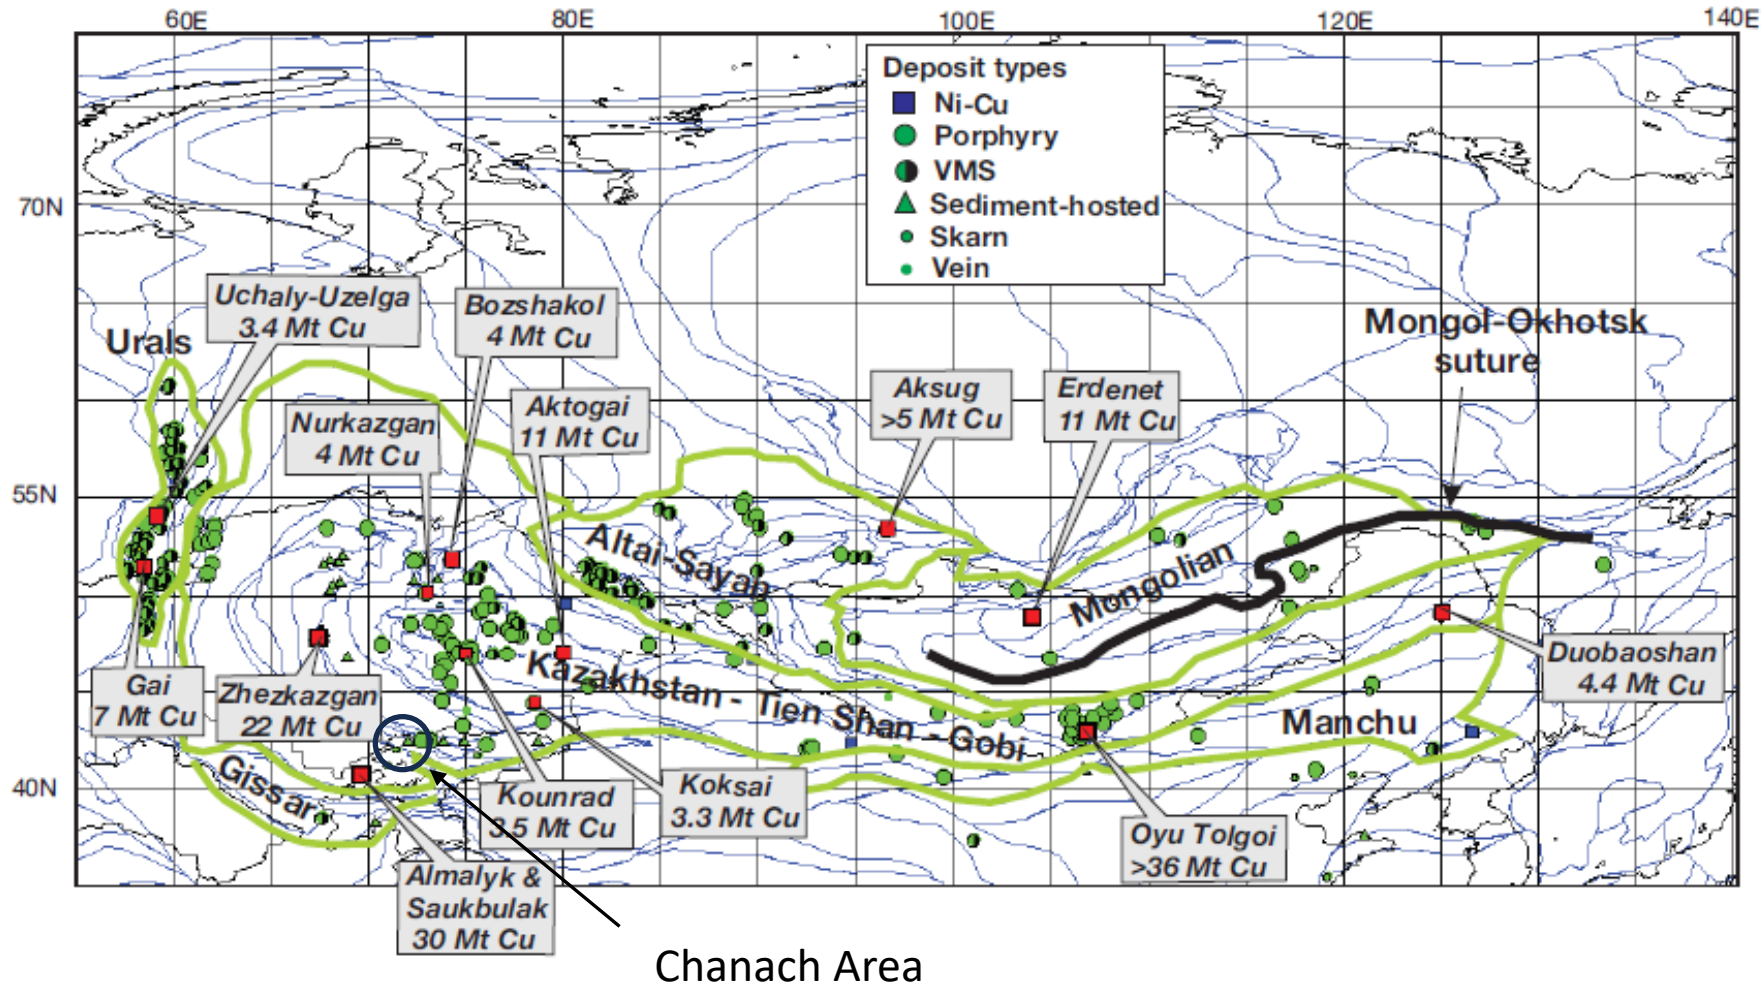

Chanach Project

EMERGING NEW MINING JURISDICTION

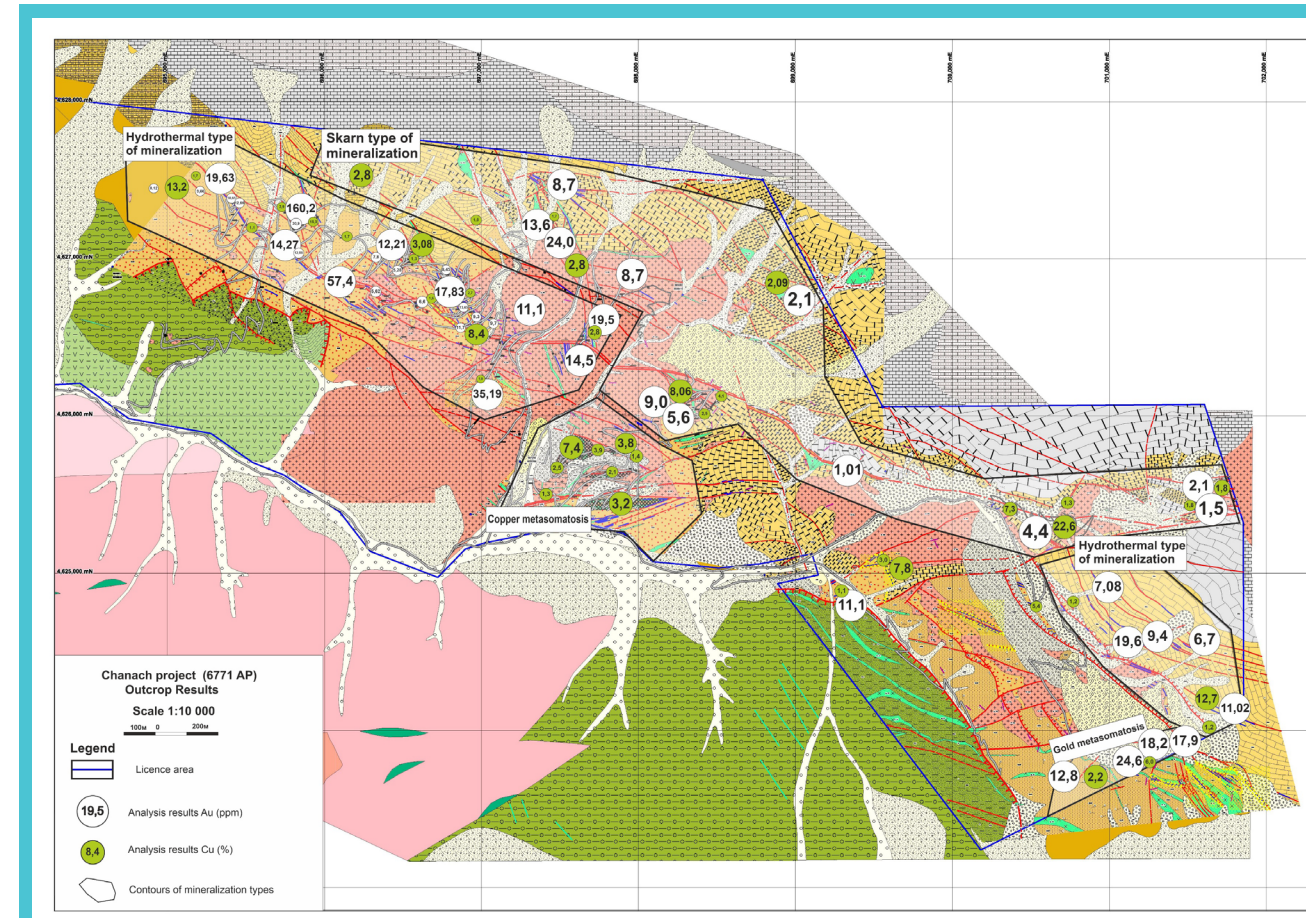

Chanach : Middle of Major Copper Province

Chanach Summary: Continued Exploration Success

An emerging high-grade copper and gold opportunity

- RTG holds a majority stake (90%) in the high-grade Chanach Gold and Copper Project in the Kyrgyz Republic
- Clear potential to host both a high-grade, large Copper – Gold Porphyry Skarn system combined with a high-grade epithermal gold system
- New results confirm multiple styles of mineralisation and more encouraging gold and copper grades along 6.5km of skarns and new structures
- **Significant high-grade results from the 6 trenches dug in late 2023 include:**
 - 17m @ 5.13g/t Au and 0.78% Cu from Cut 6
 - 3m @ 2.52g/t Au and 10.48% Cu from Cut 7
 - 11m @ 1.29g/t Au (including 1m @ 3.13g/t Au and 1.03% Cu) from Cut 8
 - 3m @ 4.15% Cu from Cut 8

Central and Eastern End of Tenement Map Showing Location/Results of Recent Exploration and Mapped Skarn Structure

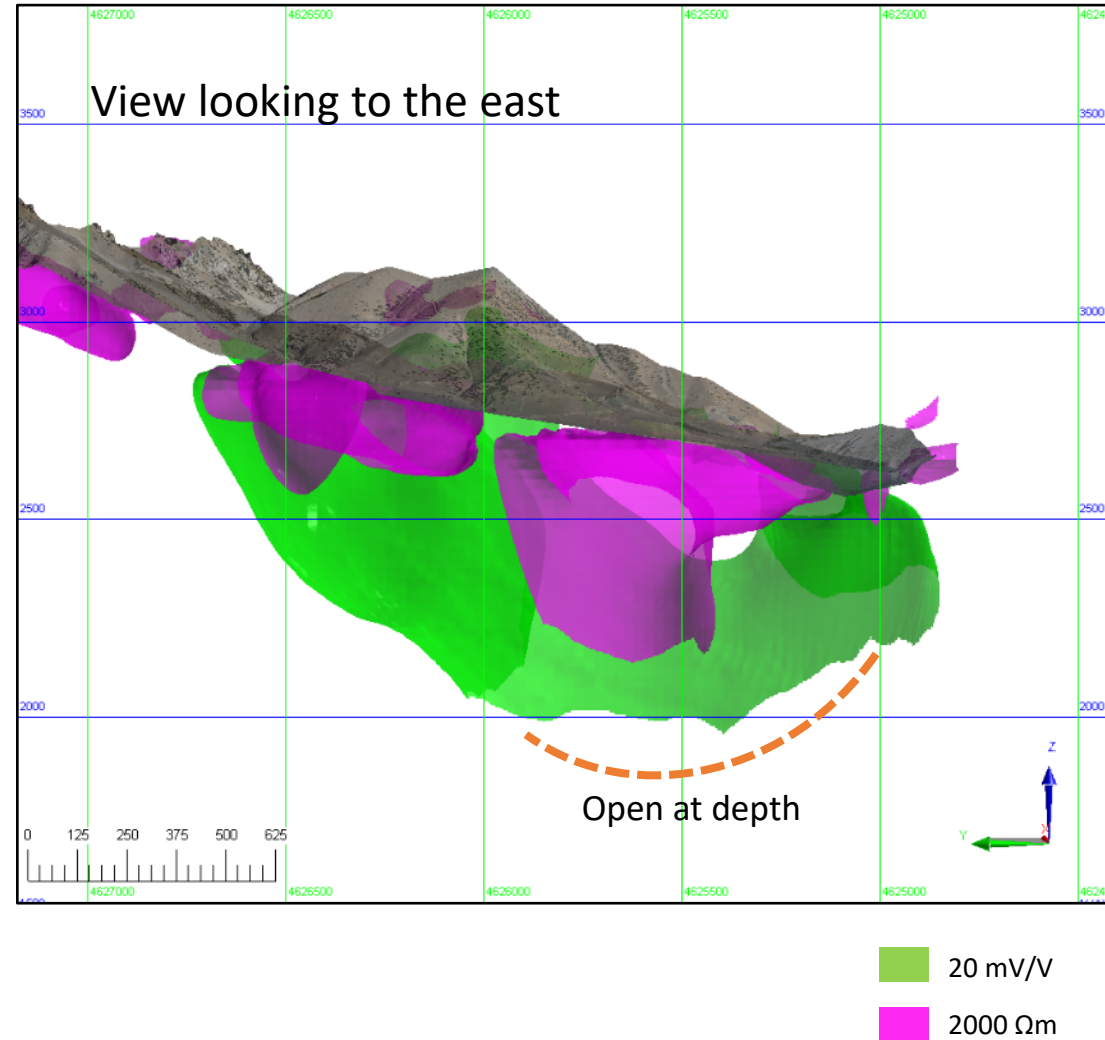

Chanach : Significant Porphyry Target Identified by IP

- Large chargeable anomaly surrounded by resistive anomaly over de-magnetised zones
- L*W*D ~1500m*1500m*+750m
- Open at depth and to the west
- Amplitudes exceeding 50 mV/V over 150m in depth (exceptionally strong response and is analogous to other major economic porphyry deposits)
- Textbook response for a large porphyry system

Chanach : Significant Porphyry Target Identified by IP

- When resistivity is incorporated into the model, it can be observed that there is a resistive shell that extends down and is open at depth. It is slightly offset from the perceived centre of the chargeable shells
- The open nature of the chargeable and resistive isoshells suggest deeper extents of the system as well as potential westerly extensions

Chanach : Significant Porphyry Target Identified by IP

Comparative example

- The high chargeability (greater than 50 mV/V) is associated with the very high content of sulphides within the system, which are signatures in both Elang and Chanach
- At Elang, resistivity clearly shows the extent of the alteration system (low resistivity) within the fresh volcanics (high resistivity)
- At Chanach, there are low resistivities surrounding a higher resistive zone, this can be due to clay alteration around a resistive lithocap

Elang Cu-Au porphyry deposit, Sumbawa, Indonesia

TOTAL resources, 100% of deposit - 1851.3 Mt @ 0.33 g/t Au, 0.32% Cu*.
